Boers Shot The Wounded

Charge Against Burglers of Murdering British Soldiers Has Been Corroborated.

The Reports of Outrages Were at First Said to Be Unfounded

Sworn Testimony of Seven Men Is Being Forwarded by Kitchener.

(Associated Press.)

New York, July 12.—The London correspondent of the Tribune says: "Referring to the Salisbury government's admission that they had information respecting the shooting of British wounded at Vlakfontein so long back as June 11th, the Daily Mail, whose correspondent was the first to make the news public, states that this is only a small portion of the policy of concealment now being carried on.

"It professes to have abundant evidence that almost the whole theatre of war is in a much worse condition than the public is allowed to know. The state of affairs in Cape Colony in particular is said to be of a most serious nature, due almost entirely to the belief among the Dutch that the constant efforts of

COMMISSIONERS' RECOMMENDATIONS.

(Special to the Times.)

Ottawa, July 12.—The Commissioners who conducted an inquiry into the question of Chinese and Japanese immigration will, it is understood, report in favor of keeping the former out and imposing restrictions on the latter.

Ministers In London

Members of Canadian Cabinet Have Been Busy in the Metropolis.

Hon David Mills Interviewed Officials Regarding Imperial Court of Appeals.

(Associated Press.)

New York, July 12.—The informal Canadian conference in London is virtually at an end, says the Tribune's London correspondent. Sir Louis Davies has sailed for Canada and Mr. Fisher, the minister of agriculture, will follow him next week.

Ministers Fielding, Blair and Dobbell will return about August, and David Mills, the minister of justice, in due course.

Mr. Mills has been more active than his colleagues since he has been in consultation with the colonial office respecting an Imperial Court of Appeals, and Mr. Fisher has also had official work. The results of the visit of the Canadian ministers will be important. Mr. Mills has clearly presented the Canadian view

MAIL STEAMER FLOATED.

(Associated Press.)

Port au Prince, Haiti, July 12.—The steamer Prins Maurits, of the Royal Dutch West India mail line, from New York, July 3rd, for Haiti and Venezuela, which stranded on the rocks here on July 10th, has been floated without having sustained serious damage.

FIRE UPON CAPITAL.

(Associated Press.)

Manila, July 12.—Cebu, capital of the island of that name, is still frequently fired upon by the insurgents. General Hughes, in command of the Visayas islands, reports progress in the task of penetrating the island of Samar and scattering the insurgents.

BOILED THE BODY.

Bullets From Remains of Murdered Chinaman Will Be Used as Evidence.

(Associated Press.)

San Jose, Cal., July 12.—The body of Lee Wing, a Chinese who was murdered last March by highlanders, has been boiled in an iron cauldron by order of the county authorities for the purpose of obtaining 16 bullets fired into the man. These will be used as evidence in the trial of Luke Lee, charged with being one of the assailants.

EPWORTH LEAGUE.

Many Delegates to Convention Have Already Arrived at San Francisco.

(Associated Press.)

San Francisco, July 12.—Already about 2,000 Eastern delegates to the Epworth League convention, which opens next Tuesday, have reached this city and are now enjoying trips to various parts of the state. It is estimated that 5,000 delegates will reach San Francisco by Sunday night, and 40,000 more by the following Thursday morning.

SALMON CHARTERS SAFE.

Shippers who have secured this year's fleet of salmon carriers do not look upon the strike situation with apprehension from a financial standpoint. Nearly all the vessels engaged for the purpose have been chartered with an option of loading wheat, so that if there is a shortage of salmon they can be filled up with grain. But they still expect a full pack, according to one of their number, the fish not having yet started to run.

Strikers In Custody

Frank Rogers and Joe Desplane Arrested in Court Room This Morning.

They Are Charged With Being Concerned in the Marooning of Japs.

One Oriental Supposed to Have Been Drowned in Wednesday Night's Fight.

(Special to the Times.)

Vancouver, July 12.—Seven Japs who were put ashore at Bowen Island yesterday morning by the union fishermen were brought down by the steamer De-fiance last evening. They were uninjured, but reports to-day are that there are thirty-six more men still on another island at present unknown to the police.

There were no union boats sent out last night by the fishermen, but one or two unimportant fights took place.

One Jap appears to have been drowned in one of Wednesday night's fights and the net of two white men cut up and the white men laid out.

A white patrol boat is going out again to-night, most of the Japs being busy fishing this afternoon.

A sensation was caused in court at the hearing of the cases of the six men this morning by the arrest in the court room of Frank Rogers and Joe Desplane, two of the best known strikers, who are charged with being concerned in the marooning. Their arrest was taken quietly, although the court room was crowded to suffocation all morning.

The constables' story of the search and finding of the firearms of the strikers in the boat where the six men were arrested was the feature of this morning's hearing. The case is still going on this afternoon.

Through The Rapids

C. D. Grahame Will Try to Navigate Niagara Whirlpool in a Barrel.

Two Farmers Commit Suicide—Ill-health and Melancholia Caused Rash Acts.

(Associated Press.)

Niagara Falls, July 12.—C. D. Grahame, who navigated Niagara whirlpool rapids some years ago in a barrel, is out with the announcement that he will again navigate the rapids next Sunday at 3 p. m. If the trip is successful he will repeat the performance for the purpose of having the biograph pictures taken of the thrilling ride through the rapids.

Repe and Buile.

Hamilton, July 12.—Sharp, a farmer of Ancaster, committed suicide on Wednesday by hanging himself and shooting himself through the head with a revolver. Melancholia was the cause of the act.

Another Suicide.

Petrolia, July 12.—Samuel Fisher, a farmer living three miles from this place, committed suicide by hanging himself yesterday morning. Ill health is considered the cause.

LONDONERS NOW SUFFER.

(Associated Press.)

London, July 12.—The hot wave is becoming more tropical. Londoners were not prepared for it and consequently they are suffering greatly. The official thermometers at 10 o'clock this morning registered from 85 to 87 in the shade, but the ordinary thermometers showed the mercury several degrees higher. There were many sunstrokes, prostrations and faintings in the streets, which kept the ambulances busy.

The number of omnibuses running was considerably reduced in consequence of the exhaustion of the horses, and the bonworks and shipbuilding yards were seriously handicapped on account of the enforced absence of the workmen, who were suffering from the heat.

VANCOUVER NOTES.

Two Thousand Orangemen Took Part in To-Day's Celebration.

(Special to the Times.)

Vancouver, July 12.—Orangemen are having to-day the biggest celebration ever held in British Columbia. They were two thousand strong in the procession, and this afternoon there are platform speeches and sports at the park.

Two men, whose names are supposed to be Carroll and Kent, blew out the gas in their room at the Delmonaco last night, and were nearly dead when found this morning. Carroll is expected to die.

COMMISSIONERS' RECOMMENDATIONS.

(Special to the Times.)

Ottawa, July 12.—The Commissioners who conducted an inquiry into the question of Chinese and Japanese immigration will, it is understood, report in favor of keeping the former out and imposing restrictions on the latter.

Campbell's Prescription Store. We keep the largest stock of Drugs and Toilet Articles in the province.

The Strike of Miners

Men Employed by Great Western Mines, in Rossland Camp, Are Idle.

Crews of War Eagle and Centre Star Will Stop Work To-Day.

Rossland, July 11.—All the miners employed by the Rossland Great Western mines are on strike to-day.

The miners' union has called on the crews of the War Eagle and Centre Star to take effect to-morrow morning at 7, when the day shift goes to work.

Several of the smaller mines have conceded to the demands for an advance of 50 cents per day in miners' wages, and have not been interfered with.

The situation has been without incident as yet, and a fairly good spirit prevails among the parties interested.

Business men and others are devoting every effort to bringing about an arrangement between the miners and mine managers, a special session of the board of trade taking place to-night for this purpose.

Copper Furnaces Closed. Trail, July 11.—The Trail smelter closed down its large copper furnaces at noon in consequence of the Rossland strike, and will close down their other copper furnaces in the next few days.

The lead furnaces will, however, be kept in operation so long as sufficient ore can keep the business supplied.

There was considerable disappointment felt at Trail when it was learned that strikers had prevented the loading of Le Roi ore for Trail. This ore had already been mined and was lying on the dump and would have aided in keeping the Trail plant in operation.

As an illustration of the general effect of the action upon the part of the leaders of the Western Federation of Miners, besides causing the laying-off, perhaps, of half the employees at Trail, the smelter is compelled to practically stop its coal, coke and limestone shipments, which in turn result in laying off numerous men in the coal and lime properties, and also compel the railway to reduce the number of crews.

SCORES OF CANADIANS. Sergeant Bodley, of the Fifth, Complimented on His Shooting. Toronto, July 11.—A special cable from Bidey camp says: "In the Golden Penny match, Pte. C. W. Spence, 48th Highlanders, Toronto, scored 26, and Lieut. J. M. Davidson, Queen's Own Rifles; 34, the highest possible is 36.

"In the contest for the Ladies' prize, open to members of the National Rifle Association, formed up by lady members, Lieut. Westmore, 74th Sussex Regiment, scored 25 points, out of a possible 50; the distance was 1,000 yards. There are five prizes of £5 each in the match." The Evening Telegram's Bidey cable says: "Sergeant S. W. Bodley, of the Fifth Canadian Artillery, Victoria, B. C., is being complimented in the camp to-day for his highly creditable score of 50 in the Alexander Martin match at eight hundred yards. He got within the inner circle in each shot of the ten allowed. The competition continues until next Monday.

"In the Armoures Company match at 600 yards, 'Red' shot, Staff Sergeant Crowe, Guelph, scored 47 and Capt. Wetmore, Sussex, N. B., 46. "Shooting at the thousand yards in the Keystone-Burgundy match, Lieutenant Giesbers, Guelph, scored 47 out of a possible 50."

NO DECISION. Conference at Pittsburg Adjourned Until To-Day Without Any Result. Pittsburg, July 11.—The great labor conference at the Hotel Lincoln to-day failed to come to any agreement. Another conference will be held at 10 o'clock to-morrow morning.

The object of the conference was the settlement of the strike ordered by the Amalgamated Association of Iron, Steel and Tin Workers in the mills of the American Sheet Steel Co., and in those of the American Steel Hoop Co. The conference had another purpose in view, the prevention of a general strike in all the mills controlled by the United States Steel Corporation, the two companies in whose mills the strike has been ordered being constituent companies of the great steel combine.

Before adjourning for lunch to-day, it was authoritatively stated that the combine offered to sign the Amalgamated scale for all the plants and make the wages uniform, but decline to unionize the plants operated as non-union for years. Trustee Morgan, of the Amalgamated Association, said the proposition would not be accepted.

POPULATIONS OF CITIES. Washington, July 11.—The census office issued a bulletin to-day concerning the urban population of the country. It shows that 28,414,800 people in the United States live in cities, and towns of over 4,000 population. This is 37.3 per cent of the entire population, a gain of almost five per cent since the census of 1890, when the percentage was 32.9.

Going Back To Work

C. P. R. Official Says Men Are Returning to Their Places Every Day

Strikers Claim Company Cannot Hold Out Much Longer—Dominion Notes.

Winnipeg, July 11.—Though there is nothing startling or new in the C. P. R. strike situation, the men here are becoming more confident every day that they will succeed in defeating the company. They say that the company cannot hold out very much longer with the track in the alleged bad state that it is in at present.

The statement that a number of strikers are returning to work in the East, the men maintain, goes for nothing, as it is in the West where the train service is suffering most for want of more men to look after the line. Trains both east and west are late every day, and instead of making up time they are, according to the men's statements, getting later.

The company, on the other hand, treats the strike as practically over and says that it has collapsed both in the East and West. The company's officials laugh at the men's statement that the road is being crippled for want of men, and say that it is simply the heavy rains of the last few weeks that have prevented them from running on fast time. They also state that every day more men are returning to work on every branch.

Decision Reserved. Winnipeg, July 11.—Argument in the Lisgar election trial has closed at Montreal and the judge has reserved decision.

The Addition Contest. Kingston, July 11.—It is likely Howard Reynolds, of Portland township, will be selected to contest Addison in the Liberal interest in the coming bye-election.

Tour of Inspection. Montreal, July 11.—Manager McNeill of the C. P. R. left for the West this morning on a tour of inspection. His trip has nothing to do with the strike. He emphatically denied that he had been waited upon by a delegation from Winnipeg representing all the other railway organizations on the road, with a view to settling the strike.

Forest Fires. Toronto, July 11.—Letters received at the parliament buildings this morning show that settlers in Temiscamingue county have had a terrible experience, forest fires raging over a considerable portion of the townships of Hudson, Kenan, Diamond, Hatley, Harris and Casey, and at least fifty families are rendered homeless. In most cases the settlers lose growing crops as well as homesteads and belongings.

A Serious Charge. Crown Attorney Cashman, of Gore Bay, was yesterday committed for trial on a charge of obtaining money under false pretences. Inspector of Legal Affairs Fleming was here in connection with the case.

Shocking Discovery. Today, in the vicinity of Toronto Junction, boys picking berries in the bush discovered the remains, picked by crows almost to the bone, of a man who had evidently committed suicide, a rope being still attached to a sapling adjacent to the body.

Both Were Drowned. A double drowning occurred at the island this afternoon. Walter Smith, aged 8, one of the children attending the West Presbyterian Sunday school picnic, got into a hole while bathing in the long pond. Ernest McKee, a boy of 15, who had only come to town from Liverton on the previous day to fill a place in a drug store, was standing on the bank and plunging in to make a gallant effort to save him; but the younger boy clasped McKee round the neck and both went down together. McKee was the only son of a widow.

VOLUNTEERS TO RETURN. Joseph Levesque Will Face Charge of Defaulting in Sum of \$20,000. New York, July 11.—Joseph Levesque volunteered in the police court at Brooklyn to-day to accompany the Montreal detectives back to that city to face the charge of defaulting in the sum of \$20,000 during his employment as a book-keeper ten years ago in the City District Bank of Montreal.

American Beauties

There are none fairer or sweeter the world over. Unfettered and untrammelled the American woman queens it as does no other woman in the world. Yet her very energy and ambition are often times her undoing.

She attempts too much. Her health is undermined. And when health goes beauty goes also. The use of Dr. Pierce's Golden Medical Discovery re-establishes the health. It cures diseases of the stomach and organs of digestion, and nutrition, and assures perfect assimilation of food and the proper nourishment of the body. It increases the blood supply and eliminates the impurities that clog the system and cloud the complexion.

Mrs. Mary E. Lewis, of Tanner, Gilmer Co., Va., writes: "Dr. Pierce's Golden Medical Discovery, 'Favorite Prescription' and 'Pleasant Pellets' cured me when doctors and other medicines failed. For fifteen years I suffered untold misery. I had given up all hope of ever getting well. I could not get down to sleep, and everything I ate would almost immediately come back. I had lost all my strength and when I commenced taking these medicines six years ago, I now weigh one hundred and forty pounds and am having better health than ever before. After being sick so long I have changed to robust and vigorous. I have taken fifteen bottles each of 'Prescription,' 'Discovery' and 'Pellets.'"

Dr. Pierce's Pleasant Pellets act gently but effectively. Women value them.

THE FALKLAND ISLANDS.

Something About Great Britain's Southern Colony—The Export of Frozen Meat.

No many persons know anything at all about Britain's most southern colony, the Falkland Isles. Even in these days of almost universal telegraphic communication, if a friend in England wishes to telegraph to the islands, he can only get his message as far as Monte Video, which is a hundred miles distant.

From Monte Video the message will be sent on by post. But the Falklands are not a thousand miles from the mainland of America; they are only about half that distance from Cape Horn. There are two large isles, East and West Falkland, and scattered around these are many smaller islets.

The area of land is about 6,000 square miles. Harborage is naturally excellent; in addition to the number of isles breaking the force of the waves the coast of the larger islands is very indented. Though the climate on the whole is favorable, never suffering from extreme of heat or cold, the soil of these islands is barren.

They and their prosperity depends entirely on sheep farming. The islands were discovered in 1592 by John Davis, the Bretonian voyager, who gave his name to the straits which separate a smaller man than some of his fellows that adventurous age. He shared the spirit of Columbus for exploring, rather than the merely piratical impulses of so many old Devon sea-dogs. A more famous but less lovable man, Dick Hawkins, was the next visitor to the lonely isles; two years later, and they came to a Dutch navigator, Sebald. Both these visitors gave their own names to the isles, in the fashion of that day—a practice which has since become an oft-mentioned puzzle.

The title "Falkland" was afterwards given by a British captain named Strong, about the close of the seventeenth century. However, the French sailors on the islands were Frenchmen, not English. England had contemplated a station here, but Spain reneged; and England, disdaining the French sailors were Academics and others, who disliked Remaining Under British Rule.

and who attempted a colony at Port Louis; but Spain's renegades in this case were not a party to the bargain, and the Frenchmen were bought out. This took place on East-Falkland. On the west isle Britain in the meanwhile placed a small garrison. Captain Byron, ancestor of the poet, had taken possession in the name of his King, in 1765, but five years later Spain's objection to the British presence in the islands forced her to evacuate.

In 1816 Buenos Ayres broke away from Spain and proclaimed her independence. It became the core of what we now know as the Argentine Republic. In 1820 this Republic took possession of the Falkland and granted East and West Falkland to Don Luis Vernet—evidently a Frenchman, in spite of his Don. Vernet was a man of a high-handed manner with some vessels belonging to the United States, he got himself into trouble, which finally resulted in Great Britain renouncing her old claims. The end of it.

These Varying Fortunes was that in 1832 the islands lay finally under the British flag; and the Argentine claim to them went to go beyond spoken protest.

The islands were at first governed by naval commanders, but in 1842 a civil government was set up. They became a crown colony, at first assisted by state aid, but latterly quite self-supporting. There is a governor, who is chief justice, a colonial secretary, who is police magistrate; and two unofficial members go to complete the legislative council.

The chief, and indeed only, town is Stanley, a population of 1,000, and with a magnificent harbor. There is an Episcopal church therein, with a small chapel or two belonging to other denominations. The population is compulsory; and the difficulty of bringing it to a scattered population is met by itinerant teachers, supported by the government. There are also day schools, one of which is for infants, there are schools belonging to the Catholics and Baptists, both receiving state aid. The goal is to have a hospital for prisoners, but during the year 1898 only that number suffered imprisonment altogether.

A Body of Marines stationed at the barracks. Most of the trade is with Great Britain, and the larger part of it is in the hands of the British and the Argentine. The headquarters are at Darwin, whose name embodies the recollection of a visit from the great naturalist; and here they are held in the company of the port, and the great part of it is in the hands of the British and the Argentine. The headquarters are at Darwin, whose name embodies the recollection of a visit from the great naturalist; and here they are held in the company of the port, and the great part of it is in the hands of the British and the Argentine.

SWEARING IN INDIA. A professor of languages, some years ago, on returning home from India, remarked upon the objectionable and unbecoming phrases among the British working classes when compared with the abundance supplied by the Orientals of similar nature. He had in mind a case which came under his own notice. He had dismissed a manservant for dishonesty, and the next morning, at 9 o'clock, he found the man standing at his door, ready to swear at him. He was furnished with a carving-knife, with which he plainly intended to emphasize his remarks. When he found it impossible to gain admission, he sat under the window, and the "swearing" process began. He cursed the professor along the genealogical tree back to the first ancestor of his race. Then he dwelt upon every detail of his anatomy, from the top of his head to the end of his toes. "For three consecutive hours he sat and swore," says the professor, "without once repeating a phrase."

While travelling on the Underground railway in London, a party of working-men entered into a conversation, and interspersed their remarks with the commonest forms of "swearing." The professor politely asked them to desist, whereupon he was told to get out of his business. He at once commenced to translate into English some specimens of Eastern oaths which he had heard of. He said that he was in every other way from him as if he had the plague, and at the next station sought another compartment.—Liverpool Post.

Despite strong opposition on the part of those opposed to a national university, the National Educational Association at Montreal, Mich. yesterday adopted a resolution affirming its former declaration in favor of such a university. The resolution reads: "Resolved, that this association hereby re-affirms its former declaration in favor of the establishment by the national government of a national university devoted not to collegiate, but to true university work."

Improvements For the City

The Council Discuss Various Matters Connected With the New Works.

Agricultural Building to Be Immediately Put in Shape For Exhibition

The city council met yesterday afternoon to take up questions of pressing importance connected with the work on the Point Ellice bridge and the exhibition buildings.

It was decided that the work upon the repairing of the exhibition buildings should be at once commenced. The carpenter work will be done by day labor, while tenders will be called for the painting of the buildings. The building will be painted white and the roof red. A committee was appointed to act with the city engineer and superintendent of buildings in carrying out the work.

The city engineer reported that he had interviewed Mr. Oddy with regard to the old garbage scow, which it was previously suggested might be used in hauling mud for filling James Bay flats from the dredge, and afterwards to carry stone for the retaining wall. The lowest price that would be accepted was \$300, and it would cost \$25 to haul it out for examination. Engineer Topp stated that 30,000 yards of mud could be conveyed by a scow before the work on the retaining wall was commenced.

It was decided that the mayor and city engineer should take action in the matter. City Engineer Topp presented a plan of the proposed sub-structure for the Point Ellice bridge, to be submitted to the Minister of Public Works at Ottawa for approval. The plan showed the piers to be erected which will be the same distance apart as in the old bridge, but the height will be two feet, and half higher than the old one. The engineer favored sending only a plan of the sub-structure to Ottawa, as it would not then bind the city to any particular design of bridge to be erected. They could call for tenders for a bridge to be placed upon this sub-structure, which would be approved of by the Dominion authorities.

The profile plan submitted by Engineer Topp was adopted and he was instructed to furnish a plan of the old bridge and information showing the superiority of the contemplated structure over the old one, which would be sent to Ottawa with the plan of the sub-structure.

A communication was received from G. H. Bernard, threatening to take action against the city unless a defective drain near his residence on Bachelor street was removed. He pointed out that it was a menace to the health of the district, and that one case of diphtheria had already resulted from it. Price also wrote in connection with the same matter.

The city engineer stated that the trouble was caused by a drain from one set of stairs, and that to remedy it it would be necessary to cut a drain through rock, costing \$75. If a septic tank was placed on the cottage premises, the nuisance could be overcome for about \$40.

The engineer was instructed to interview the owner of the cottage in the matter. Ald. Williams said a similar nuisance existed on Camosun street. Ald. Brydon thought there were several such cases in the city. He thought that the report was received on Monday night from the committee on lighting the city buildings it would be found that a saving could be made from the amount necessary to complete the plan for lighting the buildings and that it might be used for purposes of drainage.

The mayor thought the council should exercise caution with regard to expenditure until it was found what rate of taxation the estimates involved. The council then adjourned.

FOOD VALUE OF ALCOHOL.

As every one knows, there is a mighty maxim in all civilized countries against the use of alcohol. The anti-alcohol league endeavors to banish alcohol completely from the human ration. They seek to compass this end partly by forming societies or clubs, partly by educating the masses through public lectures, partly by legislation. They wish to admit from the physicians' point of view, that just as much harm can arise from wine and beer as from cognac, rum, whiskey, etc. We hope, but unfortunately it is hardly probable, that the agitation will succeed in limiting the misuse of alcohol to a minimum. Although we desire to see much more done in this respect, it is the fact that the members of the Anti-Alcohol League shall not hide or pervert firmly established scientific facts in order to favor their own agitation. One of the weapons in the fight against alcohol is the assertion that alcohol is not a food. This is not true. Unobjectionable experience has clearly thought out, have shown that the greatest part (90 to 95 per cent.) of the alcohol taken is burned in the body. During the oxidation of the alcohol, the oxidation of fat in the body diminishes. In other words, the alcohol more easily oxidized than the fat, presses to the fore, and hinders the combustion of the fat; that is, spares the fat. Something that would obtain in a stove which one should supply with coal and alcohol. The inflammable alcohol would be the first to take up the available oxygen, so that less would remain for the combustion of the coal, and in this way, less coal would be used, until the alcohol was consumed. We reckon, as was said above, among the true foods organic substances which are fitted to enter into and become a part of the body, or which by oxidation serve as source of heat and work. Alcohol lacks the first quality; it never becomes a part of the body, and has, so far as we know, no capability of being transformed into fat or carbohydrates. On the other hand, it possesses the second quality in marked degree; it becomes oxidized; it becomes a source of heat and capacity for work.

QUEEN BESS AN NEEDLEWOMAN

Queen Elizabeth was as clever with her needle as she was in every other way. In her gloomy and much-tried girlish she embroidered with gold thread the cover of a black-letter edition of St. Peter's Epistle, which was her daily companion during her residence at Woodstock. A tale which she worked after she became Queen is at Penzance. A contemporary rhyme wrote that she was a "needlewoman royal and renowned" and in another slight of verse averred that "she made the needle-her companion still."—The Quiver.

At a meeting of the machinists last night, the strike at the Newport News shipyards was declared off by unanimous vote.

THE STRIKE OF MINERS

Men Employed by Great Western Mines, in Rossland Camp, Are Idle.

Crews of War Eagle and Centre Star Will Stop Work To-Day.

Rossland, July 11.—All the miners employed by the Rossland Great Western mines are on strike to-day.

The miners' union has called on the crews of the War Eagle and Centre Star to take effect to-morrow morning at 7, when the day shift goes to work.

Several of the smaller mines have conceded to the demands for an advance of 50 cents per day in miners' wages, and have not been interfered with.

The situation has been without incident as yet, and a fairly good spirit prevails among the parties interested.

Business men and others are devoting every effort to bringing about an arrangement between the miners and mine managers, a special session of the board of trade taking place to-night for this purpose.

Copper Furnaces Closed. Trail, July 11.—The Trail smelter closed down its large copper furnaces at noon in consequence of the Rossland strike, and will close down their other copper furnaces in the next few days.

The lead furnaces will, however, be kept in operation so long as sufficient ore can keep the business supplied.

There was considerable disappointment felt at Trail when it was learned that strikers had prevented the loading of Le Roi ore for Trail. This ore had already been mined and was lying on the dump and would have aided in keeping the Trail plant in operation.

As an illustration of the general effect of the action upon the part of the leaders of the Western Federation of Miners, besides causing the laying-off, perhaps, of half the employees at Trail, the smelter is compelled to practically stop its coal, coke and limestone shipments, which in turn result in laying off numerous men in the coal and lime properties, and also compel the railway to reduce the number of crews.

SCORES OF CANADIANS. Sergeant Bodley, of the Fifth, Complimented on His Shooting. Toronto, July 11.—A special cable from Bidey camp says: "In the Golden Penny match, Pte. C. W. Spence, 48th Highlanders, Toronto, scored 26, and Lieut. J. M. Davidson, Queen's Own Rifles; 34, the highest possible is 36.

"In the contest for the Ladies' prize, open to members of the National Rifle Association, formed up by lady members, Lieut. Westmore, 74th Sussex Regiment, scored 25 points, out of a possible 50; the distance was 1,000 yards. There are five prizes of £5 each in the match." The Evening Telegram's Bidey cable says: "Sergeant S. W. Bodley, of the Fifth Canadian Artillery, Victoria, B. C., is being complimented in the camp to-day for his highly creditable score of 50 in the Alexander Martin match at eight hundred yards. He got within the inner circle in each shot of the ten allowed. The competition continues until next Monday.

"In the Armoures Company match at 600 yards, 'Red' shot, Staff Sergeant Crowe, Guelph, scored 47 and Capt. Wetmore, Sussex, N. B., 46. "Shooting at the thousand yards in the Keystone-Burgundy match, Lieutenant Giesbers, Guelph, scored 47 out of a possible 50."

NO DECISION. Conference at Pittsburg Adjourned Until To-Day Without Any Result. Pittsburg, July 11.—The great labor conference at the Hotel Lincoln to-day failed to come to any agreement. Another conference will be held at 10 o'clock to-morrow morning.

The object of the conference was the settlement of the strike ordered by the Amalgamated Association of Iron, Steel and Tin Workers in the mills of the American Sheet Steel Co., and in those of the American Steel Hoop Co. The conference had another purpose in view, the prevention of a general strike in all the mills controlled by the United States Steel Corporation, the two companies in whose mills the strike has been ordered being constituent companies of the great steel combine.

Before adjourning for lunch to-day, it was authoritatively stated that the combine offered to sign the Amalgamated scale for all the plants and make the wages uniform, but decline to unionize the plants operated as non-union for years. Trustee Morgan, of the Amalgamated Association, said the proposition would not be accepted.

POPULATIONS OF CITIES. Washington, July 11.—The census office issued a bulletin to-day concerning the urban population of the country. It shows that 28,414,800 people in the United States live in cities, and towns of over 4,000 population. This is 37.3 per cent of the entire population, a gain of almost five per cent since the census of 1890, when the percentage was 32.9.

BUSINESS DIRECTORY

BUILDER & GENERAL CONTRACTOR THOMAS CATTERALL—16 Broad street. Alterations, office fittings, warrens repaired, etc. Telephone 531.

Interesting Session

Annual Report on Women's Work Read at the Baptist Convention.

Addresses By Rev. Dr. Grant, of Vancouver, Mrs. Templar and Mrs. Vichert.

Yesterday afternoon's session of the Baptist convention in Emmanuel church was opened by prayer by Bro. Morgan. The report of the publication board, read by Mrs. Templar, showed that the Western Baptist had more than doubled its circulation during the year, the work of Editors Vichert and Matthews as editors had been highly satisfactory, and the financial department had been successfully managed.

After debate by Bros. Stevens, Bishop, McNeil, Hastings, McEwen and Vichert, the report was unanimously adopted.

At this juncture Mrs. Templar, of Toronto, favored the convention with an ally rendered solo.

Dr. D. Hafford reported the work done in the Crow's Nest district. In Cranbrook he had found eleven members, they have built a house, and wish assistance to open it free of debt.

The future policy committee was appointed as follows: Pastors Hastings, McEwen, Vichert, Van Sickle, Morgan, and Bros. Marchant, Stevens and Heard.

The ladies at their meeting elected as their year members of their board Sisters Spofford, McEwen, Morgan, King and Andrew.

Evening Session. Last evening's session was a very interesting one. The announcement that the Rev. Dr. Grant was to speak on the interesting topic, "The Baptist Position Badly Misunderstood," drew a large number of people, and it is safe to say that the church was more crowded last night than it has been since the commencement of the convention.

The report of the women's work was first read. It commenced by stating that as the women stand at the top of this year, and look backward over the year gone by, it was realized that a large amount of work was done. New circles were reported, had been established at Trail, Cranbrook and Chemainus.

The report of the women's work was first read. It commenced by stating that as the women stand at the top of this year, and look backward over the year gone by, it was realized that a large amount of work was done.

The Band report was then read. It was reported that there were seven bands, three being connected with the Sunday school. The Victoria Calvary Band in the way of contributions, they having contributed some \$54.

The literature department reported the library in a very prosperous condition. There were a large number of books on hand, and many papers, books, etc., had been distributed among the mining and logging camps.

The treasurer's report, which was next read, showed the finances in a very bright condition. In a few weeks ago there were only \$400 in the treasury, while at present the treasurer's report showed \$970 to be on hand.

Mrs. Templar then favored the convention with one of her clearest addresses on "Duty of a Mother to the Church."

She wished it noticed that she used the word mother in preference to woman. This, however, did not detract from the value of her address, which was well received by the mothers who were present.

She then went back to her original subject. In speaking of the duty of a mother to the church she meant the mother's duty to God through the church. It had been said that given the first seven years of a child's life, and you may have it for the rest of life.

not spend enough time in training them. They sometimes think if their children have good proaches and a good Sunday school teacher their duty ends there. They can, if they wish, have much to do with their future. She gave some of the different phases of church work through which mothers might do their duty.

They were to go to prayer meeting as regularly as possible, giving the children to understand their love that meeting. She thought that more children should attend the regular Sunday services.

The habit of going every Sunday was a great deal, and the children would grow up impressed with the truths heard from time to time at the Sunday services.

She thought that besides sending the children to the Sunday schools the mothers should also attend. They would in that way show the children that they liked attending church services, and also help the teachers in managing some children more than others.

Mrs. Vichert then read an address on "Why Women Should Be Interested in Missions." There were several reasons. The sisters here would not like to change places with those in India.

Rev. Mr. Hastings then introduced to the convention Rev. Elliot S. Rowe, of the Metropolitan Methodist church, Mr. Rowe made a brief address causing a good deal of laughter by his comments on the relationship of the Baptist church to the Methodist.

Rev. Dr. Grant, of Vancouver, then rose and addressed the meeting. He said it would take a long time to go fully into the subject on which he had chosen to speak. He would try, however, to make a few facts clear.

With all these stays and supports and braces, Captain Cox looks forward to making the voyage in perfect safety. He will not be escorted by any craft. His course will be to Juneau, thence along the Alaskan waters to Behring sea, and from Yakutat through False Pass to St. Michael.

The Casca has been purchased by Bro. Bruce K. Adams, of Dawson, and when she reaches her destination at St. Michael, she will be placed in the Yukon service, plying between Dawson and St. Michael.

THE BOREALIS HOME. With a catch of 1,882 fish, representing the total work of the fleet in Japanese coast waters up to her departure for Victoria, the schooner Borealis, Capt. Murray, arrived here last evening. The vessel reported in the Straits by last evening's Times.

Four Poles Ignorant of the English Language Arrive Here Yesterday. The English language arrived in this city yesterday. They landed from the Sound boat and were taken in tow by some individual who had evidently been expecting them.

OBJECTIONABLE ALIENS. Four Poles entirely ignorant of the English language arrived in this city yesterday. They landed from the Sound boat and were taken in tow by some individual who had evidently been expecting them.

NEW MACHINERY. Tramway Company Installing Fresh Machinery. The British Columbia Electric Railway Company expect to have their new 500 K. W. generator ready or use by the end of August.

MARINE NOTES. Steamer City Puebla will be due from San Francisco to-night. The Umatilla will be due to sail for the Golden Gate to-morrow evening.

Merchantsmen en route. British ship Largo Lay, with cargo consigned to R. P. Rithelet & Co., of this city, is now due from London.

Swimming. Philadelphia, Pa., July 12.—E. C. Shaefer, the University of Pennsylvania student, who broke three American records at the A. A. U. swimming championships at Buffalo, will sail for Europe on August 1st and meet the best European amateurs in various tournaments.

Change in Law Firm. Martin Griffin, of Toronto, enters as Junior Partner With Tupper and Peter. Martin Griffin, a young lawyer from Toronto, has entered into a law partnership in this city with the firm of Tupper & Peters, which will in future be known as Tupper, Peters & Griffin.

The Bad Man. The bad man was not necessarily bad at all. He is often a very good fellow. He is merely a synonym for danger.

Submarine Experiences. Experiments continue to be made in France with submarine vessels. Here is an account which appeared recently in the Figaro of M. Gaston Cammets' experiences in a submarine trip at Cherbourg.

The Casca For Dawson

Sternwheeler Leaves Here on a Long Ocean and River Trip To-Day.

Borealis Returned From a Cruise on Japan Coast With Catch of the Fleet.

A voyage heretofore looked upon with a good deal of fear and trepidation for craft of the river type is to be undertaken by Captain James Cox, a Columbia river navigator, who leaves to-day for Dawson, via St. Michael.

Mrs. Vichert then read an address on "Why Women Should Be Interested in Missions." There were several reasons. The sisters here would not like to change places with those in India.

Rev. Mr. Hastings then introduced to the convention Rev. Elliot S. Rowe, of the Metropolitan Methodist church, Mr. Rowe made a brief address causing a good deal of laughter by his comments on the relationship of the Baptist church to the Methodist.

SPORTING

BASEBALL. TOMORROW'S GAME. The Victorias and the Puyallup Hop-Flickers play at Oak Bay to-morrow.

Several of the Tacoma Greys, who played here last Saturday, when asked about the Puyallup nine, declared them one of the best amateur teams on the Sound.

The local club will put their strongest team in the field. Holmes and Schwengers will compose the battery. Barnes will be on first base, Wildwood on second, Hayes on third, McCannell or Neelands at short, Rooke in left field, Copeland centre field, and Harrison right. Smith, Potts and Barnwell on the bench.

The boys will wear their new uniforms, which will give them a far more appealing and graceful appearance on the field than the old black and grey suits.

The Puyallup line up is as follows: Roster, pitcher; Ross, catcher; McNeff, 1st base; Campbell, 2nd base; Morton, 3rd base; Shingleton, short stop; Hayes, left field; Shupland, centre field; Laycock, right field; T. McNeff, substitute.

The game will be called at the usual time, 3:15, and Geo. Smith will handle the indicator.

There is a good possibility of the Victorias securing Neelands, an amateur player of exceptional ability. This gentleman is here in search of employment, and should he secure a position will join the local team. He took part in the regular practice of the team last evening, and handles himself well, covers lots of ground and bats splendidly.

Should McCannell be unable to play in Saturday's game Neelands will take his place at short.

LAWYER. RUSSELL THE VICTOR. The play in the single finals in the Seattle Tennis Club's tourney has resulted in the victory of R. Russell over H. Hurd, over G. A. Hurd. Referring to this match, which must have been a splendid one, the Post-Intelligencer says:

"Hurd has been playing a fine game this year, and was looked on by his many admirers as almost sure winner. Opinions were freely expressed that he would win out in three straight sets. Russell himself did not expect to win the event, but was determined to play his best. His game up to this point had been very erratic. Up to this time he had not won a set from either Hurd or Newton, and was almost defeated by Myers on Friday morning in a poorly played contest. His matches in general had been characterized more by their hard hitting than by their scientific work."

"When the match began, yesterday Russell started out in very good form, hitting hard, but at the same time using his head at every stroke. His service was well placed and he advanced to the net at every opportunity. His balls were all well placed and dropped very near the net. It seemed almost as if he could not get hitting the tapes, his overhead smashing being very strong and his play very fast. He used his drive very seldom, but was very steady. Russell held his pace well and won the set, 8-6.

"In this set Russell made 23 of his points on clean passes, 29 by balls driven out by Hurd, 7 by balls driven into the net by Hurd and 2 points on his service. A total of 52 points. Hurd scored 13 points on passes, 22 on balls driven out by Russell, 8 on balls driven into the net, and 1 point on a double fault by Russell. Total of 44 points.

"In the second set Hurd was unable to stand Russell's fast net game, and the set went to Russell after eight games, scored by Hurd, 10-8. Russell scored 16 points on passes, 7 on nets and 12 on balls driven out. A total of 35 points in his favor. Hurd scored 4 points on passes, 8 on nets and 12 on balls driven out. A total of 24 points.

"In the third set the score was for a time very even, and it looked as if Hurd might win out after all. After 5:15 he called against him he braced and tied the score, only to lose three more games and the match. Score of the final set 9-5. In the final set Russell made 22 points on passes, 7 on net balls, and 7 on balls driven out. Hurd scored 10 on passes, 2 on net balls, 13 on outs, 1 on service and 2 on double faults. Total of 25 points for Russell and 28 for Hurd.

"In the entire set there were 22 deuce advantage games. A summary of the entire game would be 119 points for Russell and 96 for Hurd. Russell scored 61 on passes, 17 on nets, 39 on outs, and 2 on service. Hurd scored 27 on passes, 18 on nets, 47 on outs, 1 on service, and 2 on double faults."

Mrs. Howell and Miss Fisher won the ladies' doubles. Mrs. Howell and Russell the mixed doubles, and Mrs. Howell the ladies' singles.

FINAL FIGHT MONDAY. The finals of the Victoria Tennis Club handicap tournament will be played on Monday next. The fixtures are: 2:30 p. m.—A. R. P. Martin and Miss Goward vs. Capt. Bowler and Mrs. Burdett. 4 p. m.—A. T. Goward and Mrs. Crow Baker vs. winners of 2:30 match. 5:15 p. m.—A. T. Goward, 30.1, vs. B. G. Prior, ret. 2-6 of 15.

CRICKET. INTER-SCHOOL MATCH. (Associated Press.) London, July 12.—The annual cricket match between Eton and Harrow began at Lords to-day. The weather was sultry, but there was a large attendance of fashionable people. At luncheon time Eton had scored 154 runs for eight wickets down.

SWIMMING. GOING TO EUROPE. Philadelphia, Pa., July 12.—E. C. Shaefer, the University of Pennsylvania student, who broke three American records at the A. A. U. swimming championships at Buffalo, will sail for Europe on August 1st and meet the best European amateurs in various tournaments.

Failure of the Accumulators. Were the electricity to fail everything would come to a stop. Darkness would overtake the boat and imprison it for ever in the water. To avoid any such disaster there have been arranged out of the tubs and low down a second section are the electric accumulators, which give the light and power. In the third, near the screw, is the electric motor, which transforms into movement the current of the accumulators. Under all this, beneath the floor, from end to end, are immense water ballasts, which can be emptied or filled in a few seconds by electric machines, in order to carry the vessel up or down. Finally in the centre of the tube, dominating these three sections, which the electric light illuminates, and which no partition divides, the navigating lieutenant stands on the look-out, giving his orders.

The Morse is now about to sink. The commander's place is no longer in the helmet or kiosque, whence he can direct the route along the surface of the sea. His place is beneath in the very centre of the tub, in the midst of all sorts of electric manipulators, his eyes continually fixed on a mysterious Optical Apparatus, which he opens. The other extremity of the instrument floats on the surface of the water, and whatever the depth of the passage, it gives him a perfectly faithful and clear representation, as in a camera, of everything occurring in the water.

The most interesting moment of all now comes. The lieutenant, by the marine chart verifies the depths. The casks of water are filled, and our supply of air is thereby renewed from their stores of surplus air. The plunge is so gentle that in the silence of the waters one does not perceive the process of descent, and there is only an instrument capable of indicating, by a needle, the depth to which the Morse is penetrating. The vessel is advancing while at the same time it descends, but there is no sensation of either advance or roll. As to respiration, it is as perfect as in any room. The crew can remain under water 16 hours without the slightest strain. Our excursion on this occasion lasted scarcely two hours. By means of the periscope which, always invisible, floats on the surface, and brings to the vessel below a reflection of all that passes up above, the captain shows us the Narval, which we were to rejoin. From the depth in which we are sailing we watch its slightest manœuvres."

The Supreme Lodge of the Knights of Pythias yesterday decided to raise the insurance rate to the maximum prescribed by the National Fraternal Congress to meet the deficit of \$500,000 in the treasury endowment fund. The alluvial gold that is got in the Coolgardie district, Western Australia, is found to a depth of from four inches to four feet in the ground, and very often in big slugs weighing from 2 to 50 ounces.

WEATHER BULLETIN.

Daily Report Furnished by the Victoria Meteorological Department.

Victoria, July 12-5 a. m.—The summer type of high barometric pressure is spreading over this province, while from California eastward the barometer is low. These conditions will cause continued fine weather throughout the North Pacific slope, and considerable heat between the ranges. In the Territories the temperature ranged from 80 to 90 degrees yesterday, and will be as hot there to-day.

Forecasts.

For 6 hours ending 5 p.m. Saturday, Victoria and vicinity—Moderate to fresh westerly winds, fine and moderately warm to-day and Saturday.

Lower Mainland—Light to moderate winds, fair and warm to-day and Saturday.

Reports.

Victoria—Barometer, 30.07; temperature, 46; minimum, 46; wind, 4 miles S. W.; weather, clear.
New Westminster—Barometer, 30.08; temperature, 42; minimum, 40; wind, calm; weather, clear.
Nanaimo—Wind, N. E.; weather, fair.
Kamloops—Barometer, 29.98; temperature, 40; minimum, 41; wind, calm; weather, fair.
San Francisco—Barometer, 29.84; temperature, 50; minimum, 48; wind, 8 miles S. W.; weather, clear.

WARNING TO WHEELMEN.

EXHIBITION NOTES. Satisfactory Arrangements as to Cartage—Space for Display to Be Tendered For.

The hall committee of the Agricultural and Mining Association met yesterday afternoon. Secretary Boggs reported that he was in receipt of a very large number of applications for floor space for display purposes during the exhibition. The applications include firms from various parts of Canada and the United States. It was decided to outline a plan of the building for purposes of allotting space. The committee will meet on Monday afternoon at 4 o'clock, and if the plans are forwarded to the exhibition, the applications will be thrown open to the public, and tenders called for the various allotments. By this method it is thought satisfaction will be given to all parties desiring space.

The printing committee met this morning, and placed an order for 5,000 additional copies of the price list, making 10,000 copies in all.

The Traunau company have commenced work upon the extension of their line to the exhibition grounds, and it is expected that the work will be completed in a considerable time before the opening day.

Special arrangements have been completed with the express and draymen by which a uniform rate will be charged for the conveyance of exhibits from the railroad stations and wharfs to the grounds and back again. Small packages of less than 100 pounds are to be left at the secretary's office in the market building, and will be forwarded to the grounds at the uniform rate of 25c. for each package.

Through the generosity of S. M. Robins, superintendent of the New Vancouver Coal Company, the funds of the British Columbia Agricultural and Mining Association will be enriched by \$53. H. D. Helmcken, M. P. P., has received the following explanatory letter on the subject:

Dear Sir—Mr. Robins directs me to say that the company will be pleased to subscribe \$50 to the Victoria show, and asks you to apply it in any way you think best. Yours truly, W. R. BRYANT.

FAVORABLE COMMENT.

London Musical Review Speaks Highly of Victorian's Composition.

Critical musical publications in the United Kingdom continue to comment most favorably on the composition by Mr. Geo. Burnett, of this city, "Abide With Me." One of the latest criticisms appears in the Musical Review, of London, England, in which the composer is highly complimented on the excellence of his production. This is only one of the many eulogiums of the composition, among those who have expressed their admiration of it being their Majesties the King and Queen, Their Excellencies Lord and Lady Minto, Madame Albani and many other distinguished personages.

There is one thing in connection with these notices, especially the one by Mr. Geo. Burnett, which is worthy of note. This is the fact that the author is correctly described as resident in Victoria, and not Vancouver. In many parts of the United Kingdom there appears to be a blissful ignorance of the existence of any other municipality in Western Canada but Vancouver, the error being attributable doubtless to the fact that this city is situated on Vancouver Island.

CONCERT AT OAK BAY.

Programme of Music to be Rendered by Fifth Regiment Band to-Morrow Evening.

The Fifth Regiment band will give a concert at Mount Baker hotel, Oak Bay, to-morrow night, and will, no doubt, attract a large number of people. The programme follows:

- PART I.
 - March—"Col. Brett".....Hall
 - Overture—"Dramatic".....Boettger
 - Char. Dance—"Little Egypt".....Bergenholtz
 - Medley Selection—"Topinners".....Chattaway
 - (Introducing—"Give Me Back My Lie," "I Don't Know Why I Love You, But I Do," "Lam, Lam, Lam," "Good Bye, Dolly Gray," "Just Because She Made Them Go for Eyes," and "The Village Belle.")
 - Waltz—"Sweet Repose".....Max Witt
- PART II.
 - Medley Selection—"Popular George".....Boettger
 - (Containing—"My Little Georgia Rose," "Phiny, Come Kiss Yo' Baby," "Just We Two," "Believe," "Every Race Has a Flag But the Coon.")
 - (a) Oriental Intermezzo—"Omar".....Leralao
 - (b) Dance d'Algers—"Kaya Kaya".....Boettger
 - Gavotte—"Favitation".....Waltz
 - Selection for "The Isle of Capri".....Furst
 - Cake-Walk—"Bunch of Blackberries".....Holzman
 - God Save the King.

Judgment Delivered

Decisions in Cases of Victoria vs. Bowes and Victoria vs. Bales.

Taxes Cannot Be Collected From the Tenants of the Crown.

In the Supreme court judgment has been delivered by Mr. Justice Drake in Victoria v. Bowes and Victoria v. Bales. The cases are somewhat similar in character. In the first one the city of Victoria attempted to collect from the defendant taxes for the premises he occupied in the old post office building, on Government street, upon the ground that Dominion government property was exempt only when utilized for crown purposes. Judgment has been delivered for the defendant with costs.

In the case of Victoria v. Bales, the action was undertaken to collect taxes for judgment on the Indian reserve. Sundry property on the Indian reserve. Sundry judgment was given for the defendant with costs.

In Haggerty v. Glenora Mount Sicker Company, Mr. Justice Drake has also given judgment. The case involved a dispute as to accounts in connection with the hauling of ore from the mine by the plaintiff. Counter claims were also made on the part of the defendant company concerning transactions which were undertaken by the plaintiff for the company. The judgment delivered goes fully into the various accounts disputed, which are to be examined by the registrar, who may employ a competent accountant in his adjustment of the claims.

In Fresh v. Fresh, before Mr. Justice Irving, the examination of S. Perry Mills with regard to the accounts connected with the administration of the estate occupied yesterday afternoon and this morning. The case is still being continued.

THE ATHENIAN ARRIVES.

C. P. R. Steamship Reached Quarantine This Morning. Saloon Charters Have Wheat Option.

The C. P. R. liner Athenian arrived at quarantine from China and Japan this morning, and was tendered on off the outer wharf by the steamer Trader. Her machinery, it is said, was not working satisfactorily, and for this reason her captain did not wish to come in to the harbor without delay. The ship left the Orient on the 26th of last month. She brought for Victoria six out of a total number of 33 Chinese aboard. The other travellers aboard were ten intermediate passengers from Manila. Her cargo was made up largely of tea.

The Charmer, Steamer Charmer, will leave Vancouver at 6 o'clock this evening. She will probably connect with the Eastern train.

Summer Hosiery

It would be hard to find a customer that we could not please in Hosiery. We have many kinds. An ample range of black, every pair bearing the stamp of the world's best dyes—a proof of fast colors.

15c, 25c, 35c
Extra-special Lisle thread, 50. These may be had either in plain black or with fancy embroidered effects. Many lines in fancy Hosiery with artistic touches of color blending that is quite new.

Mining News

Southeast Kootenay. Dan Hunter has made a rich copper strike on Bull river. The North Star still continues to ship tons of silver-lead ore daily. A rich vein of ore has been struck in the tunnel of the Carbonate King mine on Skookum Chuch.

The numerous placer mines in this district, on Wild Horse and Perry creeks, are being worked extensively, and while the rush for quartz is going on the placer miners are keeping right on washing out the yellow metal. It is expected that this year's production of gold will double that of 1900.

The No. 1 tunnel on the Estella, at Tracy creek, is in 200 feet, the No. 2 tunnel has been run for 800 feet, the No. 3, or Rover tunnel, is in 800 feet. A shaft is also down 60 feet. The ore body in the Rover tunnel is 12 feet wide; the ore is galena. The vein in the Estella tunnel varies from three to six feet; the ore is a high grade copper. The long tunnels are well ventilated by 1,000 feet of air pipes. There is a large amount of ore on the several dumps.—Fort Steele Prospector.

In the Stocan. Messrs. Ehrenseller and Beer, representing the Antwerp Smelting & Refining Company of Antwerp, Belgium, were here this week to make arrangements to handle the silver-lead ores of Stocan. They would either handle it through the local smelters and refiners or by shipping the ores to Antwerp. They have visited all the leading properties tributary to Stocan, and in consultation with the best authorities here on the mining situation.—Kootenain.

Bert McNaught and George Fairbairn of Silvertown are developing the Star Point group of seven claims, at the head of Springer creek, adjoining the Hampton, and 2,000 feet from the Black Prince. The claims, which are comparatively new locations, have fine surface showings. Work has exposed the Black Prince lead.

Donald McPhail has made a magnificent strike of six inches of black sulphides of iron at the Glauce group on Bear Lake. It is a group on which McPhail Bros. spent \$1,500. D. McPhail found the vein in two days. It assays 7,900 ounces in silver, value \$4,710.

E. D. Wilson, smelter expert of the Standard Smelting Corporation of Montreal, and W. H. Jefferys, mining engineer, have returned from a trip across the lake to the Leviathan group. The character of the rock is considered most suitable for fluxing silver-lead ores, and as it carries good values the large quantity available and the convenience to transportation may help to settle the smelter problem. Mr. Wilson leaves for other camps at once, and will be gone for about two weeks. On his return he expects to have his report ready for presentation.

A large pack train with supplies, including an ore car and track, has gone to the L. H., and work in the lower tunnel will be pushed to tap the ore body at depth. The L. H. is on Red mountain, four miles southeast from Silvertown, and is one of the best properties whose future depends so much upon the building of the Rockland road.

At the Boson development only is being carried out, but the work is very satisfactory. During the week a fresh ore body was encountered in the No. 3 or center tunnel, which has been found in the hill that has been found in this tunnel before. The new strike shows 13 inches of clean galena.

The cables for the tramway on the Hewitt are being strung and another week should see ore coming to the wharf in a lively manner from the property. On the Condon, the four-mile creek, about six inches of fine galena has been discovered in place. This property is working a full crew, and is the property of the Northwest Mining syndicate, and is under the management of William Sandford, manager of the Boson.

Rosland Camp. The Rosland Miner in its weekly mining review, which appeared in Sunday's issue, says: The output of ore from the Rosland mine for the week ending last night touched low water mark for the year. The aggregate tonnage, 2,110, makes a poor showing alongside of the figures for a few weeks ago, when the tonnage touched the 12,000 mark, but consolation may be taken from the statement of the management that next week will see the former conditions restored. It is probable that within a fortnight the Rosland mine will be producing more than ever, and the tonnage will once more pass the 10,000 point, and from there gradual increases may be confidently looked for.

The reason for the small output is obvious—the closing of the Rosland Great Western properties. The Le Roi has been the only one of the group of mines to ship ore, and the quantity forwarded to the Trail and Northport smelters was only a fraction of the normal production. Manager McDonald informs the Miner, however, that after Monday no further interference with the ordinary production will be experienced from lack of cars, and that the mine will then contribute its normal quota to the camp's output. This will swell the tonnage to its recent large dimensions. All this, of course, is conditional on the full force of men remaining at work.

In addition to the Le Roi curtailment, the holidays, Dominion Day and Fourth of July, interfered with the work in other mines, the Centre Star and War Eagle principally, so that their output was smaller than ordinarily.

The Iron Mask would have shipped twice the quantity of ore had cars been available. The mine ships its ore in cars built up to retain the rock, this being necessary because the ore is loaded from wagons, and the construction of a platform would be necessary if ore cars were utilized. The C. P. R. is arranging a supply of these cars, and next week the mine will be able to send out 200 or 250 tons of ore, as intended. Meantime the

Table with columns: Loc, Week, Year. Lists production for Le Roi, Centre Star, War Eagle, Rosland, Iron Mask, etc.

Following is the output for the week ending July 6th and the year to date: Le Roi 1,150 166,448; Centre Star 20,270; War Eagle 510 10,540; Rosland 1,820 53,238; Iron Mask 100 2,323; I. X. L. 30 210; Monte Cristo 30 20; Spitzee 80; Glant 563; Evening Star 54; Portland 24.

Totals 3,119 200,907. Rosland Great Western Properties.—The miners employed in the properties under this caption were given a week's lay-off, commencing on the 28th ult., and embracing two holidays and one Sunday. As most of the miners wished to and probably would have taken the holidays, the actual working days passed over numbered four.

One of the reasons for this action on the part of the management was the lack of facilities for handling ore, but the main reason was the fact that it was necessary to put into effect several important changes at the Le Roi surface works. These changes included the putting in of drop-proof floors in the timber framing and machine shops, the changing of the miners' dry rooms from the Black Bear tunnel to the new location in the Le Roi head-works, and the location of landing platforms at the surface and various stations in the mine from the new shaft. During this period it was impossible to carry on mining operations without serious interference to the work in both branches, hence the lay-off. It was found that the work could not be completed at the Le Roi on Monday the striking of the rock at the station cut in the shaft was at the 1,050-foot level, and it has been completed.

In the Rosland Great Western mines proper, development work is again under way. This consists of the usual drifting and crosscutting on the 450, 500 and 550-foot levels. At the Columbia-Kootenay, drifting is under way on the 400 and 600-foot levels of the combination shaft sunk below the No. 3 tunnel. The work at the mine has been confined during the week to drifting and stoping. On the 200 and 500-foot levels the drifts are being extended and ore taken out for shipment. On the 400 and 650-foot levels stoping is under way. Four machines are in use in the mine. As already stated, the management could not secure sufficient cars to handle the ore stopped and the bins at the mine are full to the brim. Cars are being prepared by the C. P. R. for the shipments from the Iron Mask, and this week will see something of a record for the year established in point of output.

I. X. L.—The mine shipped thirty tons of ore on Monday last, this being the largest single shipment ever sent out. Of this amount two tons was the bonanza ore which the company expect will realize anything up to \$5,000. The returns have not been received from the smelter as yet. The balance of the ore in shipment was \$30 to \$40 rock. During the week stoping has been continued on the No. 2 and No. 4 levels. Spitzee.—Drifting from the 100-foot level to crosscut the ore body was carried on during the week, and good progress made. On Friday the tunnel broke into a fine showing of excellent copper ore. The company does not expect, however, to encounter the main ore chate until the tunnel is in some 20 feet.

Homestead.—The first car of ore to be shipped from the mine is being loaded and will probably be sent out to-day. The underground work consists largely of driving on the ledge, and the ore extracted in the course of this work is being hoisted and prepared for shipment. Four.—The usual development work at the Big Four has been prosecuted during the week. The Rosland Mines.—All the big mines in the Rosland camp are operating with full crews, and the indication is given that the number of working miners will be increased within the next few weeks. The practical settlement of the labor troubles has created an excellent effect in the camp, and there is every indication of a lively season in Rosland.

A RACE TO THE ALTAR. To recall the fact that Prince Albert, coming to this country on his bridal tour, drove from Dover to London by railway, the Minister of the Interior has changed in daily life brought about within the reign of Queen Victoria. The bridegroom-elect crossed the Channel on January 6th, 1840, and was rudely buffeted by the sea. He was so upset that, in spite of the urgency of his errand, he lay all night at Dover. Settling forth at 2 o'clock next day, halting there long enough to receive an address from the mayor and corporation and to attend service in the cathedral. At 9.30 he resumed his journey, rattling through Chatham and Rochester, where the mayors and corporations stood by the roadside looking for opportunity to present addresses.

Once on the wing, the bridegroom travelled swiftly. At New Cross an escort of the 14th Dragoons was in waiting, with orders to conduct His Serene Highness with due state across the metropolis. The Prince fled from them as if they had addresses to present, arriving at Buckingham Palace an hour ahead of them. The journey was concluded at 4.30 in the afternoon, the road from Canterbury having been covered in just seven hours.—H. W. Lucy, in the Strand Magazine.

THE BEST REMEDY FOR STOMACH AND BOWEL TROUBLES. It has been in the drug business for twenty years and have sold most of all the proprietary remedies of any kind. Among the entire list I have never found anything to equal Chamberlain's Colic, Cholera and Diarrhoea Remedy for all stomach and bowel troubles.—O. W. Wakeland, of Columbus, Ga. Massacre At Quelpart

Number of Converts Killed by Enraged Natives—Several Hundred Slain. Riot at Limchow—Lots of Damage but Nobody Hurt—Other News.

Massacre At Quelpart

An Oriental exchange received by the Athenian to-day contains the particulars of the massacre at Quelpart Island. Ri Zaigo, governor of Quelpart, has sent in a minute report on the recent trouble. He says the revenue officials of late years have been levying various heavy taxes and have used the converts to bring pressure to bear on the natives. Defiantly were often arrested on a pretext to comply with the demands of the officials. The latter also instigated the converts to ill-treat the natives in various ways. The natives held a meeting at a place one in distant from Saisshufu to see what measures could be taken to check the abuses. While the meeting was in progress two French missionaries, arrived on the spot and opened fire on the natives, killing one and wounding three men badly. This enraged the natives that they killed eight converts, and forced their way into the town and released the six men who had been arrested. The converts took flight when they saw the French missionaries and the French missionaries concaved themselves in the house of the local governor of Seij-gan. The natives killed over 50 converts and posted placards ordering the arrest of all found alive. Later over 250 converts, who were hiding in various villages, were captured and killed. One of the converts, a man named Cho Laga, escaped in a boat and telegraphed to the French minister to Seoul of the affair. French warships subsequently arrived at the island and threatened to land marines and exterminate the natives, but they were persuaded not to carry out their threat. Two companies of Korean troops are stationed on the island at present. The governor asks the government to address an official note to the French minister with a view to stopping the dispatch of French troops, lest the converts should rise again to wreak vengeance on the natives. According to a dispatch from Pakhoi from one of the Oriental papers, a riot recently occurred at Limchow. The natives there, who were always against European institutions of all kinds, did not appreciate the presence of missionaries in the present instance, and they collected a crowd of natives and started to demolish the house in question without any reason whatever. The prefect and the sub-prefect, as soon as they were informed of this proceeded in person to the scene of the disturbance to stop the people from carrying on the work of destruction, but the officials arrived too late for that, as by that time the mission property was completely destroyed, and they only succeeded in dispersing the crowd of miscreants without making a single arrest. The shopkeepers and traders, fearing that the affair would take larger dimensions, shut up their shops and business was consequently paralyzed for part of that day. The German missionaries, who were all in Pakhoi at the time of the disturbance, were only informed of the matter in the afternoon by some of the native Christians, and shortly after by an emissary from the prefect of Limchow, by whom an apology was tendered and an offer made to pay for the cost of the destroyed property. Vice-Admiral Sir Commander Bridge, K.C.B., who becomes commander-in-chief of the British squadrons in these waters, the Nagasaki Press of June 14th says, arrived at Yokohama on Monday by the C. P. R. steamer Empress of India. Sir Commander's visit to the battleship "Gloria" at 8 a.m., and his flag was immediately hoisted and saluted. In connection with the above it is stated that the Centurion, with Vice-Admiral Sir Edward Seymour on board, was expected at Nagasaki on the 14th from Wei-hai-wei, and there is reason to believe that the transfer of the command of the British squadron will take place at that port. The "Gloria," with the new admiral on board, will leave Yokohama for Nagasaki on the 15th inst. The Sobranu never have been back, says the Japan Mail, and the Princess Irene would never have been in danger had the new system of Monday & Gray for submarine signalling been in use in the fog-laden regions of Far Eastern seas. It is really a matter well worthy of diplomatic attention whether the foreign powers, when negotiating new commercial treaties with China, should not require her to abate the peril of her coasts by utilizing this new system. The building of light-houses is a tedious and costly business, but to fasten a bell to a submerged buoy and connect it with an electric battery on shore is both speedy and inexpensive. If ships are fitted with electric receivers such a bell can be heard plainly at two miles. It will not be long before all ships of war are supplied with receivers, for a vessel thus furnished cannot possibly be surprised by a submerged torpedo boat. The water catches and transmits every vibra-

INTERESTING SESSION. (Continued From Page 3.) The Baptist convention opened this morning with devotional services by Pastor B. H. West at 9 o'clock, and at 9:30 the morning's business was commenced. The report on the state of religion was first read, after which came the reports on obituaries and on time, place and preachers. The three recommendations made by the Sunday school committee came up for discussion. It will be remembered these recommendations were laid over on the night which they were made on account of lack of time to fully discuss them. The recommendations are that 1, Canadian Sunday school papers should be furnished the school in preference to those of the United States; 2, that a certain day be fixed to be known as Decision Day, when a special effort will be made throughout all Baptist churches to bring the lost to Christ; 3, that on certain dates examinations be held among the children; 4, that a course of examinations be provided for the officials of the Sunday schools. These recommendations were fully discussed this morning, and the convention came to the decision that it would be for the good of the schools if they were put into effect. It was therefore decided to have them in the future adhered to and made the law of the Baptist Sunday schools. This afternoon the members of the convention are resting themselves after the tedious days of uninterrupted business by a cruise up the Gorge in a launch. They are to be entertained by the members of the local church. The picnickers left at 2 o'clock this afternoon. This evening will be the last session of the convention. There is a considerable amount of business to be transacted. The following is the programme: 7 p. m., devotional, Pastor Davies, 7:30 p. m., B. Y. P. U. report, Pastor A. W. McLeod. Symposium—"Training for Service." (a) "In the Sunday School," H. Northcott, (b) "In the Church," Pastor M. Van Sickle, (c) "Among the Unsaved," Pastor I. Williamson, 9 p. m., address, Pastor J. G. Matthews, M. A.

Massacre At Quelpart

ALL RECORDS BROKEN. Missouri and Southern Illinois Now Feel Effects of the Heat Wave. (Associated Press.) Kansas City, Mo., July 12.—At 9 a.m. the mercury reached 91, with the prospect that all previous heat records will be eclipsed before noon. Last night was the most oppressive experienced here in years. Hardly a breath of air stirred. Among the poor residents of the bottoms there was great suffering. One prostration has been reported up to 9 o'clock. Crops Being Destroyed. St. Louis, Mo., July 12.—At 9 a.m. the government thermometers showed 95 in parts of Missouri and Southern Illinois, where the crops are being literally burned up by temperatures up to 110. Records for thirty years have been broken. Cooler Than Yesterday. Louisville, Ky., July 12.—During the night the temperature fell rapidly from yesterday's record of 103, and at 9 a.m. today stood at 80, with a pleasant breeze prevailing.

SHAMROCKS AGAIN OUT.

Challenger and Ex-Challenger Try Conclusions on Firth of Clyde. (Associated Press.) Rothsay, July 12.—The two Shamrocks started on a trial race at 11:15 a.m. to-day of Rozany Point. The yachts were under jib headed topsails, and a good 12-knot breeze was blowing. Shamrock I, then held the lead by half a dozen lengths. She was served with a better wind as the boats reached down the channel, but outside the wind died and Shamrock II began to overhauled the older boat. Mishap to the Independence. Bateman's Point, July 12.—The Independence's topmast was carried away immediately after crossing the line to-day. The crew cleared away the wreck of the topmast and club sails and the race was resumed.

NEGRO BANKS.

National Convention to Be Held at Buffalo in September. (Associated Press.) New York, July 12.—A national convention of negro banks of the United States has been called to meet at Buffalo for September 26th-28th. It is proposed to organize a national association of colored bankers. CELEBRATIONS IN BELFAST. Large Number of Soldiers and Police Are on Duty. (Associated Press.) Belfast, July 12.—The celebration of the Battle of the Boyne is being marked by the customary collisions, but no serious trouble has occurred, there being plenty of soldiers and police to control the factions.

WHEAT IMPORTS.

Liverpool, July 12.—The receipts of wheat during the past three days amounted to 250,000 cwt., including 23,000 American. The receipts of American corn amounted to 108,100 cwt.

ENGLAND WON ELCHO SHIELD.

London, July 2.—At to-day's shooting at Bisley, England won the Elcho Challenge Shield, with a score of 1,600. Anyone troubled with boils, pimples, rashes, fevers, sores, or any chronic or malignant skin disease, should use Doan's Back Itches, externally and take internally. It will cure where others fail.

JONES, CRANE & CO. AUCTIONEERS. WILL BUY YOUR Furniture and Merchandise For Cash.

JONES, CRANE & CO., AUCTIONEERS. WILL SELL YOUR Furniture, etc., For Cash. Do you want cash? If so, call at the City Auction Mart, 73 Yates street.

BREAKFAST BY BUTTON.

What Electricity Will Do in Ten Years' Time. Intelligently handled, the electric current will do in a few hours what it has taken man and Nature years of ceaseless toil to accomplish. Timber is now seasoned by electricity. The wood is immersed in a solution containing borax, resin and soda, and surrounded by metal plates. These are connected with a dynamo, thus completing an electrical circuit.

THE PITTSBURGH CONFERENCE.

Situation Has Not Changed, But Both Sides Are Hopeful of Reaching a Settlement. (Associated Press.) Pittsburgh, Pa., July 12.—When the conference between the Amalgamated Association executive board and officials of the American Steel, Sheet and Hoop Tin Plate Companies, to settle the existing strike, was resumed to-day, the situation apparently had not changed from yesterday morning, although both sides appeared hopeful of ultimately reaching a settlement. The conference adjourned for lunch at noon. The morning session, it is said, was taken up entirely by the arguments of manufacturers, and the main issues of the conference remained untouched. President Shaffer said nothing definite had been done and refused to talk further. Judge Carve did not put in an appearance at the Hotel Lincoln during the morning, but was looked for in the afternoon.

WALL STREET.

New York, July 12.—The majority of stocks showed fractional declines in the first sales. The loss in Rock Island was 2 points, and in U. S. Steel and Reading 1 1/2. Mo. Pac., Southern Pac., Erie and St. Paul showed fractional advances, but St. Paul immediately reacted a point, and U. S. Steel also fell a point after opening unchanged. The stock market opened easy. Amal. Copper, 113 1/2, ex div.; Atch., 75 1/2; Rio, do. pd., 57 1/2; ex div.; B. R. T., 74; Erie, 37 1/2; do. 1st pd., 67 1/2; Louisville, 103 1/2; Mo. Pac., 104 1/2; Ont. & W., 31 1/2; Penna., 144 1/2; Reading, 29 1/2; St. Paul, 15 1/2; Segar, 138; Southern, 29 1/2; do. pd., 45 1/2; Union Pac., 52 1/2; Wabash, C. & L., 60 1/2; U.S. Steel, 98 1/2; do. pd., 43 1/2; 43 1/2; W. U., 90 1/2; Rock Island, 136.

STOCK QUOTATIONS.

(Published by the N. Y. Stock Exchange Limited.) New York, July 12.—The following quotations ruled on the Stock Exchange to-day: Open, High, Low, Close. American Sugar, 138 1/2, 139 1/2, 137 1/2, 137 1/2. C. M. & S. P., 109 1/2, 109 1/2, 108 1/2, 108 1/2. People's Gas, 113 1/2, 113 1/2, 112 1/2, 112 1/2. Manhattan, 117 1/2, 118 1/2, 115, 115 1/2. B. R. T., 74, 75, 73, 74. Union Pacific, 104 1/2, 104 1/2, 103 1/2, 104 1/2. A. T. & S. F., 75 1/2, 75 1/2, 74 1/2, 74 1/2. A. T. & S. F. pd., 97 1/2, 97 1/2, 96 1/2, 96 1/2. U. S. Tobacco, 139, 139, 129, 129 1/2. Amal. Copper, 113 1/2, 113 1/2, 112 1/2, 112 1/2. Chic. Great West., 23, 23, 22, 22. C. R. I. & P., 136, 136, 135 1/2, 135 1/2. Money 2 to 4 1/2 per cent.; last loan 2 per cent.

TO CURE A COLD IN ONE DAY.

Take Laxative-Bromo-Quinine Tablets. All druggists refund the money if it fails to cure. 25c. E. W. Grove's signature is on each box. The Italian paper La Corriere della Sera announces that the government is contemplating a tax on bachelors owing 22,000 or more, the tax to be proportionate to their fortunes. English Kensington Art Squares in a nice assortment of colors, also a few Donee-Rugs in two-tone effects, at Weller Bros.

LEMPS. The demand for Lemp's Extra Pale St. Louis Beer

PURE, SPARKLING, WHOLESOME AND REFRESHING. A grand feature of the Lemp's Beer is that should a bottle be opened and contents not all consumed at once, the remaining quantity in the bottle is just as good the next day; it does not get "flat" as most beers do. This is a great saving to the dealer or consumer. The cost of Lemp's Extra Pale is no more than other imported beers, but the quality is far superior. The Lemp's can be had at all first-class Hotels, Clubs, Restaurants and Refreshment places throughout British Columbia and the Yukon Territory. Ask your grocer for it; if he does not keep it come to us; we will see that you are supplied. Never sold in bulk. Bottled only at the Brewery in St. Louis.

PITHER & LEISER IMPORTERS, VICTORIA, B.C.

FRUIT JARS AT Watson & McGregor's Telephone 745. 90 Johnson Street.

Let us take, for example, the tarantula cure for tetanus (lockjaw) and St. Vitus' dance. It is the discovery of an Italian physician, and is based on the idea that the bite of a tarantula is a certain remedy for the disorders mentioned. The live tarantulas are kept bottled (like leeches), but it has been found wiser to allow the ravenous-looking insects to bite pieces of flannel, and thus deposit their venom on a strip of material which is placed on the patient, rather than to apply them directly to the body of the sufferer, whose nervous system would hardly be invigorated by such a contact. Then we have the Kneipp cure, which consists of waving barefooted through wet grass in the early morning. Imagine a number of persons in dressing-gowns and other varieties of "undress uniform" gravely padding with bare feet up and down a stretch of dew-drenched meadow land at daybreak. Yet such a spectacle might have been witnessed many times on the continent and in America when the cure was at its height. That's nothing, sir. In Aberdeen they smoke had-locks.

THE BUSY MAN OF TO-DAY

Couldn't accomplish half the work without the aid of the many labor-saving electric appliances. If you want your house, store or building wired for electric lighting, burglar alarm, call bells, telephones or any electric device, we will do it in the most scientific manner at a reasonable price. THE HINTON ELECTRIC CO., LD., 62 GOVERNMENT STREET.

Campers, Attention

We are headquarters for everything you want. Cooked meats of all kinds. Pork, Veal and Ham, and Chicken Pie. French-butter, Eggs, and all kinds of Fruit. Windsor Market, W. H. Beatty, Manager, 97 AND 99 FORT STREET.

THE ART OF THE PHYSICIAN.

Many of us have snored, or been horrified, according to temperament, over the barbarous methods of the physicians and surgeons of the older time. Their weakness for "cupping, bleeding and blistering," and for administering strange and horrible decoctions in huge doses, no longer prevails among the medical fraternity, says a writer in Cassell's Saturday Journal, under the title of "Heroic Cures Adopted Now-a-Days." Nevertheless, it is a question whether some of our modern remedies for disease are not such as our forefathers—hardly as they were—would have regarded with a shudder. Let us take, for example, the tarantula cure for tetanus (lockjaw) and St. Vitus' dance. It is the discovery of an Italian physician, and is based on the idea that the bite of a tarantula is a certain remedy for the disorders mentioned. The live tarantulas are kept bottled (like leeches), but it has been found wiser to allow the ravenous-looking insects to bite pieces of flannel, and thus deposit their venom on a strip of material which is placed on the patient, rather than to apply them directly to the body of the sufferer, whose nervous system would hardly be invigorated by such a contact. Then we have the Kneipp cure, which consists of waving barefooted through wet grass in the early morning. Imagine a number of persons in dressing-gowns and other varieties of "undress uniform" gravely padding with bare feet up and down a stretch of dew-drenched meadow land at daybreak. Yet such a spectacle might have been witnessed many times on the continent and in America when the cure was at its height. That's nothing, sir. In Aberdeen they smoke had-locks.
